Professional Summary

Senior backend engineer with 10+ years turning ageing CRM and SaaS systems into fast, secure, and maintainable platforms, from the first line of architecture through years of hands-on production ownership. Deep, versatile expertise across Laravel, PHP, MySQL, PostgreSQL, Vue.js, and AWS, paired with a reputation for catching the problems others miss: slow queries, security blind spots, and technical debt quietly eating away at a team's velocity. Just as comfortable setting technical direction as writing the code itself, with a track record of mentoring engineers and building the infrastructure, including Redis queues, CI/CD pipelines, and centralized logging, that lets teams move fast without breaking things.

Skills

Databases: MySQL, PostgreSQL, MongoDB, Redis

Backend & Frameworks: PHP, Laravel, Vue.js, CodeIgniter, WordPress, OpenCart

DevOps & Infrastructure: AWS, Amazon EC2, CI/CD (Bitbucket, YAML), Linux (Ubuntu, CentOS), Apache, NGINX, PHP-FPM, Redis Queues

APIs & Integrations: REST APIs, Payment Gateways (Stripe 3D, Authorize.net, Paytrace, Elavon)

Testing & Tools: PHPUnit, Jira, Agile Methodologies, Git, Composer

Specialties: SaaS Product Scaling, CRM Systems Architecture, Database Performance Tuning, Production Debugging & Incident Recovery

Professional Experience

Meta Frolic Labs (Pvt.) Ltd.

May 2023 – May 2026

Senior Technology Lead

Karachi, Pakistan

- Owned architecture and technical direction for a full-featured CRM platform, scaling it to reliably serve 1,500+ concurrent users with near-zero downtime
- Rebuilt query logic across a multi-table CRM dataset, cutting a 50+ second report load down to sub-second, unlocking real-time dashboards for leadership
- Led a technical debt cleanup across the codebase, cutting debt by 40% through refactoring, standardized error-handling, and centralized logging
- Introduced Redis-backed queues and background workers, and built the production deployment pipeline (Bitbucket CI/CD, Linux/Apache/NGINX)

Salsoft Technologies (Pvt) Ltd

Nov 2022 – May 2023

Senior Technology Lead

Karachi, Pakistan

- Joined the core team behind a ground-up SaaS revamp, reimagining a legacy portal into an all-in-one workspace combining project/task management and team collaboration, positioned as an alternative to tools like TeamWork
- Architected backend services with Laravel APIs, Vue.js, MySQL, and Redis, using Supervisor-managed queues to handle background processing at scale
- Built live dashboards and activity-driven notifications, giving teams real-time visibility into projects and progress
- Designed a platform-wide logging system for fast debugging and full auditability

Salsoft Technologies (Pvt) Ltd

Jun 2019 – Nov 2022

Senior PHP Developer / Team Lead

Karachi, Pakistan

- Led development and deployment of a full-featured billing portal, covering lead management, invoicing, and short-payment-link payment pages, built with Laravel, React, and MongoDB
- Identified and resolved a company-wide email spam issue affecting all in-house brands, rebuilding the vulnerable systems with Laravel, PHP, and MySQL to close the security gap
- Developed a Stripe-integrated client payment portal (Laravel, MySQL, MongoDB) while leading code reviews and mentoring the team

PNC Solutions Pakistan

Nov 2016 – Jun 2019

Senior PHP Developer

Karachi, Pakistan

- Built and maintained a classified listings website and its admin management portal using CodeIgniter, HTML, CSS, and jQuery
- Developed a Laravel-based CRM for a timber and hardware supply client (hardwoods, softwoods, hardware, outdoor WPC), managing orders, measurements, and invoicing
- Delivered additional client projects using Laravel and built e-commerce websites on OpenCart, WordPress, and Shopify

Salsoft Technologies (Pvt) Ltd

Aug 2013 – Oct 2016

PHP Web Developer

Karachi, Pakistan

- Built a games website with an integrated CRM and social networking features (profiles, connections, activity feeds), plus a custom CMS platform for client website management, both using CodeIgniter
- Developed an online learning portal for teachers and students (class videos, communication tools, discussion forums) and multiple e-commerce sites on WordPress

Education

Mehran University of Engineering and Technology, Jamshoro

Jan 2008 – Dec 2011

Bachelor of Engineering, Computer Systems Engineering
