SUMMARY

Senior full-stack engineer with deep Laravel experience and recent products in React, Next.js, and React Native. Owns software end to end, from database design and APIs to interfaces, deployment, and production support. Kept a business CRM running smoothly for 1,500+ people using it at the same time, made slow reports load almost instantly (from 50 seconds to a fraction of a second), and made the code easier and cheaper to maintain. Uses AI tools (Claude, Cursor) to ship faster, with code review, testing, and monitoring on every release. Experienced tech lead who mentors engineers and sets technical direction.

SKILLS

Languages: PHP, JavaScript, TypeScript, SQL

Backend: Laravel, Node.js, REST APIs, Livewire, Filament, Redis queues

Frontend and Mobile: React, Next.js, Vue.js, React Native, Expo, Tailwind CSS

Databases: MySQL, PostgreSQL, Redis, MongoDB, Supabase

Cloud and DevOps: AWS, Linux, NGINX, Vercel, CI/CD pipelines

Payments: Stripe (3D Secure), Authorize.net, Paytrace, Elavon

Tools: Git, PHPUnit, Vitest, Sentry, Jira, Claude, Cursor

EXPERIENCE

Meta Frolic Labs (Pvt.) Ltd. **May 2023 - May 2026**

Senior Technology Lead *Karachi, Pakistan*

- Owned architecture and technical direction for a CRM portal (Laravel, Filament, Livewire, MySQL), scaling it to 1,500+ concurrent users with near-zero downtime.
- Cut a sales report from about 50 seconds to 200 ms by rewriting queries, adding composite indexes, and caching in Redis, enabling real-time dashboards for leadership.
- Reduced technical debt by 40% through refactoring, standardized error handling, and centralized logging.
- Introduced Redis queues and background workers, and built the Bitbucket CI/CD pipeline to Linux, Apache, and NGINX servers.

Salsoft Technologies (Pvt) Ltd **Nov 2022 - May 2023**

Senior Technology Lead *Karachi, Pakistan*

- Core team member on ProjectCamp, a ground-up SaaS rewrite combining project management, sales, billing, and client collaboration.
- Designed backend services with Laravel APIs, Vue.js, MySQL, and Redis, using Supervisor-managed queues; owned staging and the CentOS to AlmaLinux migration.
- Built live dashboards, activity notifications, and a searchable platform-wide log for debugging and audits.

Salsoft Technologies (Pvt) Ltd **Jun 2019 - Nov 2022**

Senior PHP Developer / Team Lead *Karachi, Pakistan*

- Led a billing portal for leads, invoices, and payment links (Laravel, React, MongoDB) integrating Stripe 3D Secure, Authorize.net, Paytrace, and Elavon.
- Found and fixed a company-wide email spam vulnerability affecting every in-house brand.
- Built a Stripe client payment portal while leading code reviews and mentoring the team.

PNC Solutions Pakistan **Nov 2016 - Jun 2019**

Senior PHP Developer *Karachi, Pakistan*

- Built a classifieds website and admin portal (CodeIgniter), and a Laravel CRM for a timber supplier covering orders, measurements, and invoicing.
- Delivered client projects in Laravel and e-commerce sites on OpenCart, WordPress, and Shopify.

Salsoft Technologies (Pvt) Ltd **Aug 2013 - Oct 2016**

PHP Web Developer *Karachi, Pakistan*

- Built a games website with CRM and social features, a custom CMS, and an online learning portal with video classes, chat, and forums.

PROJECTS

Chalkback - AI learning app (mobile and web) **2026**

React Native, Expo, Supabase, LLM APIs, RevenueCat, Stripe, Sentry | chalkback.vercel.app

- Users teach a YouTube video back to two AI students who question the gaps; answers are checked against the transcript.
- Designed and built with Claude for rapid development, with every change reviewed and production monitored in Sentry and PostHog.

Northline - E-commerce store **2026**

Next.js, React, TypeScript, Drizzle ORM, Neon Postgres, Vitest, Vercel | northline-revamp.vercel.app

- Store with search, guest cart, account checkout, and order history; API routes covered by Vitest.
- Designed and built with Cursor for rapid development, with every change reviewed and tests passing before each deploy.

EDUCATION

Mehran University of Engineering and Technology, Jamshoro **2008 - 2011**

Bachelor of Engineering, Computer Systems Engineering
